RE: CIP 100030 Ocean Park Beach Restoration Project – Project Update 1

Dear Property Owner,

The beach restoration of Ocean Park Beach is almost here! As you may be aware, the City of Virginia Beach is partnering with the Virginia Port Authority (VPA) to place 400,000 cubic yards of beach quality sand along Ocean Park Beach. The sand will be mined as part of the VPA's Thimble Shoal Channel deepening project. The beach restoration project limits are between the west side of Lesner Bridge and Rookery Way. The Contractor who will be performing the work is Great Lakes Dredge & Dock Co. LLC (GLDD). They plan to begin beach restoration construction efforts as early as Thursday, May 19, 2022. The construction duration is expected to last approximately four weeks, dependent on any weather, equipment, or unforeseen conditions.

Please be advised that up to 1,000 feet sections of the beach will be temporarily restricted at the immediate work area including public beach accesses. The work area will be fenced off to protect the public from the construction activities. GLDD will have safety personnel stationed at various locations along the sand placement work area to advise the public on how to safely navigate around the work site. This is expected to be a 24hr/day operation.

We request property owners to please remove property off of the beach before sand placement begins. Property may include (but not be limited to) sand fences, signs, volleyball posts, kayaks, catamarans, etc.

If I can provide any further information or you have any questions, then please contact me at 757-385-4838, or e-mail me at jawhite@vb.gov.

Sincerely,

James D. White, P.E.
Public Works, Coastal Sr. Project Manager
